### PROFESSIONAL SUMMARY

Results-oriented Android Developer with 4+ years of hands-on experience building and shipping production-grade Android applications using Java and Kotlin. Proficient in Jetpack components, Kotlin Coroutines, Firebase, and RESTful API integrations. Experienced in FinTech and e-commerce domains with a track record of delivering secure, scalable, and high-performance mobile solutions.

### TECHNICAL SKILLS

Languages: Java, Kotlin (Coroutines, Flow), XML, JSON

Frameworks & Libraries: Android SDK, Jetpack Compose, ViewModel, LiveData, Navigation, DataStore, Retrofit, Room, SQLite

Cloud & Backend: Firebase (Auth, Analytics, Crashlytics, FCM, Realtime Database), Spring Boot (basic), REST API, SOAP

Tools & IDEs: Android Studio, VS Code, Gradle, Git, GitHub

UI/UX: Android Material Design, XML Layouts, Jetpack Compose

Other: Bluetooth Thermal Printer Integration, Aadhaar Verification APIs, Mantra RD Device, Google Maps SDK

### PROFESSIONAL EXPERIENCE

Android Developer | Anniyam Payment Solutions, Coimbatore Sep 2021 – Present

Designed and developed Android applications from scratch using Java and Kotlin for payment and digital banking platforms.

Implemented Kotlin Coroutines and Flow for asynchronous operations, improving app responsiveness and data handling efficiency.

Built scalable app architectures using Jetpack components: ViewModel, LiveData, Room, DataStore, and Navigation.

Integrated third-party SDKs including Retrofit for REST APIs and SOAP for legacy service communication.

Implemented secure local storage using Room, SQLite, and SharedPreferences for sensitive financial data.

Developed real-time chat and live driver and customer tracking features using Firebase Realtime Database and Google Maps SDK.

Worked on SHG (Self-Help Group) banking apps handling digital loans, repayments, and secure transaction reporting.

### KEY PROJECTS

Kaippai – Shopping App | E-Commerce | Android

Developed a location-based Android shopping app that surfaced nearby deals and offers for users.

Implemented REST API calls using Java and Retrofit to fetch real-time product and offer data.

Integrated FCM push notifications for promotional alerts and order updates.

Added Bluetooth thermal printer support for in-store bill generation.

Used SOAP APIs for integration with legacy inventory management systems.

#### Money Purse – SHG Banking App | FinTech | Android

Built a digital banking solution for Self-Help Groups to manage loans, repayments, and member accounts.

Implemented Aadhaar-based KYC verification using Signzy, Leegality, and Digio APIs.

Integrated Mantra RD biometric device for secure member authentication during transactions.

Ensured secure and auditable reporting with robust data validation and error handling.

#### EDUCATION

B.Tech – Information Technology 2016 – 2020

Vellalar College of Engineering & Technology, Erode | CGPA: 6.5 / 10

#### KEY STRENGTHS

Strong understanding of Android app lifecycle, memory management, and performance optimization.

Quick learner adaptable to new technologies — currently upskilling in React Native.

Effective team collaborator with experience in Agile/Scrum delivery environments.

Ability to multitask and deliver high-quality work under tight deadlines.
